WORKING DATA FOR DEMAND ANALYSIS

Agriculture-Washington

U. S. Department of Agriculture
Agricultural Economics Division
Agricultural Marketing Service

Working Data for Demand Analysis

The attached tables contain a number of time series frequently used in statistical demand analysis.

Although these tables have been prepared by the Income and Demand Section of Farm Income Branch, much of the data originate in other Government agencies, including the Department of Commerce, Bureau of Labor Statistics, and the Bureau of the Census. Some of these data have not been previously published and some of the current data are preliminary. The material as a whole is not for general publication and the exact status of each series can be ascertained from the appended footnotes.

These tables are revised once a year, usually in October, by the Income and Demand Section of the Farm Income Branch, Extension 4740. Since some of these data are regularly compiled by other agencies, it is suggested that current revisions of basic data, particularly the estimates of total income and expenditures of the Department of Commerce and the estimates of prices by the Bureau of Labor Statistics can best be obtained directly in publications from those agencies.

Table 1.--Population, United States 1914-57

Year	Total popula- tion January 1 <u>1</u> /	Farm popula- tion April 1 <u>2</u> /	Total popula- tion July 1 <u>3</u> /
	<u>Thousands</u>	<u>Thousands</u>	<u>Millions</u>
1914	98,248	32,320	99.1
1915	99,891	32,440	100.5
1916	101,314	32,530	102.0
